

Respected Sir/Madam,

SAFAL ERP FEATURES

- Management Synopsis – At a glance, summarized view of vital parameters of your entire operations distributed over multiple locations in a single screen.
- A Unique Primary / Detailed Systems Requirements Study (SRS) methodology where we enter prospect's Sample Live Data, Department Wise, in "SAFAL" so that they verify how their business is handled by us in terms of availability of Masters, Transactions and Reports before they place the order.
- Off-Line/On Line Multidirectional Data Synchronization from Multiple Locations
- User defined design of Reports, Documents and Vouchers on the top of abundant existing ones without our help
- Events based messaging for events covering your organization's vital parameters Generate your own statutory transactions type (for example VAT transactions) without our help
- Unlimited Multimedia Files can be attached to any Masters or Transactions for truly "Less Paper Operations".
- Pin Point Tracking-A unique Defrauding System
- Your entire operations are controlled by Policies and Procedures defined by you independent of People. Respond faster to these frequently changing Policies and Procedures.
- User defined Fields (in the category of Name, Number, Date etc.) can be added to any master or transaction as and when required to be further tracked by User Defined Reports (UDR)
- Between any two transactions, one can define Events/Documents for tracking the progress of the business transactions along with messages to relevant users after predefined period.
- Department wise/ User wise View and Privileges resulting into ultimate security; enabling even a First Time user to start entering company's data within maximum 15 Minutes.
- Product Costing before Quotation and attach the Product Costing with Quotation for later reference.
- Built In "No Miss" intra office communication
- User Defined Quality Control Policies and Q C Parameters
